## ASEAN University Network

# AUN-QA CERTIFIED

## OUR CLINICAL SCIENCES PROGRAM IS QUALITY GUARANTEED

Quality is synonymous the School of Global Health (SGH), Faculty of Medicine, Chulalongkorn University (MDCU) in our graduate and post-graduate courses, especially our Clinical Sciences Program. We are proud to be recognized and certified by ASEAN University Network Quality Assurance (AUN-QA).

To give a little background on the ASEAN University Network, it is one of the world's leading higher education networks that emphasizes on advancing curriculums and learning approaches, assuring quality in higher education, developing student skills through cross-border exposure and experiences, promoting and cultivating research collaborations, and a thematic network of likeminded institutions.

Only a select few programs have been able to rise to the high standards of this prestigious governing body and we are here to show you why our Clinical Sciences Program has been accredited by AUN-QA.

With accreditation criterion ranging from Programme Structure and Content, Programme Specification, Expected Learning Outcomes, Academic Staff Quality,

Support Staff Quality, Student Quality & Support to Facilities and Infrastructure, the Clinical Sciences Program at the SGH, MDCU has not only met, but surpassed the highly set international standards to help raise academic standards and enhance education, research and service of AUN member institutions.

The multi-disciplinary research-based program in clinical sciences aims to produce competent clinical researchers with specialized scientific ability and skills, ready to be part of the active national and international driving force for health sustainability.

With both M.Sc. and Ph.D. programs, the Clinical Sciences Program at SGH, MDCU, offers a great deal of flexibility to customize courses that suit the individual's learning needs. These research-based international programs offer a wealth of study and clinical attachments in a variety of scientific disciplines from both pre-clinical and clinical departments.

M.Sc. students can drive their own research in their interested field of clinical practice, learning of research design, methodologies,

ethical considerations and other practical standards within the scientific arena while Ph.D. candidates will take the lead become independent investigators upon completion of their degree. High potential students in which enrollment in clinical training programs can be done in tandem with their ongoing clinical research. No matter which way is chosen, the possibilities are limitless.

Come join our experts and immerse yourself in the rich research environment. Experience state-of-the-art facilities and share knowledge beyond borders at the SGH. With the overall aim of these programs to produce high quality researchers in a variety of clinical sciences, the certification by AUN-QA is proof of SGH's commitment to local and international clinical and research excellence.— S.P.
